

REMARKS

The present application is a divisional application of U.S. Patent Application 08/920,954.

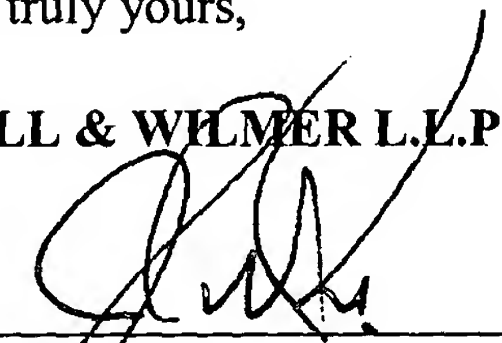

In the parent application Applicant was required to provide a new set of drawings to insure that there was adequate disclosure of the content and lines. In order to comply with the request for a new set of drawing Figures, various original Figures had to be enlarged and accordingly placed on two or more sheets of drawings. Descriptions in the specification referring to the original Figure now collectively refer to two or more sheets of drawings which provide the same disclosure as set forth in the original specification. Accordingly, the Description of the Figures and the specification has been amended in order to accommodate the requirement for Formal Drawings. These amendments do not add any new matter and have been made expressly to comply with a drawing requirement.

It is requested that the references cited in the prosecution of the parent application be considered in the prosecution of this divisional application and accordingly Applicant attaches herewith a form A820 listing those references. The relevance of the references was set forth in the prosecution of the parent application.

If the Examiner believes that a telephone interview will help further the prosecution of this case, the Examiner is respectfully requested to contact the undersigned attorney at the listed telephone number.

Very truly yours,

SNELL & WILMER L.L.P.
